

**IN THE CLAIMS:**

Kindly cancel claims 11, 12 and 17, and amend Claim 1 as follows:

1. (Currently Amended) An adhesive gel composition for an iontophoresis comprising:

(a) 1 to 20% by weight of lidocaine and 0.001 to 0.5% by weight of epinephrine, both in free form,

(b) polyacrylic acid,

(c) a poly-functional epoxy compound,

(d) water,

(e) a polyhydric alcohol; and/or,

(f) a gelatin, sodium hydrogen sulfite and oxyquinoline sulfate, in a total weight ratio of 30:1 to 60:1, as antioxidants; and

(g) an antioxidant gelatin, as an optional ingredient,

wherein a weight ratio of the drug(s) lidocaine and epinephrine, in total, in free form to the polyacrylic acid is in a range of from 3:1 to 1:3.

2. (Cancelled)

3. (Cancelled)

4. (Cancelled)

5. (Cancelled)

6. (Cancelled)

7. (Cancelled)

8. (Previously Presented) An adhesive gel composition for an iontophoresis according to Claim 1, wherein the weight ratio of lidocaine to epinephrine is 1000:1 to 2:1.

9. (Cancelled)

10. (Cancelled)

11. (Cancelled)

12. (Cancelled)

13. (Withdrawn) An iontophoresis device comprising a donor electrode, a reference electrode and a power supply connected electrically to each of the donor electrode and the reference electrode, wherein the current output from the source device is at least one of a direct current, a pulse direct current and a pulse depolarized direct current and wherein the current rate is 0.25 to 5.00 mA·min/cm<sup>2</sup>.

14. (Cancelled)

15. (Cancelled)

16. (Cancelled)

17. (Cancelled).
